Summary

With a knack for visual storytelling, design and a robust business background, I bring over five years of industry experience, particularly in startup environments. Proficient in collaborating with cross-functional teams, and ensuring pixel-perfect design components.

Real World Projects

Front End Developer, UX/ UI Designer

EmpTorix, United States (Jun 2024–Present) | Contract

- Design Hi-fidelity web UI from the ground up for early-stage AI Insights platform.
- Built information architecture, wireframes, user flows and interactive prototypes.
- Execute all visual design stages from concept to final hand-off to engineering.

Web Content Developer

[California Science and Technology University](#) Milpitas, California (Oct 2023–Jun 2024) | Internship

- Created website design for veteran admission on CSTU's main website.
- Developed computer programming concepts and AI educational content.
